

JOB

DESCRIPTION

M&E Engineer

Job Title:	M&E Engineer
Department:	Engineering - Capita
Reporting to:	Field Services Manager
Responsible for (staff):	None
Location:	Field – South East
General Purpose of Role:	To carry out planned and reactive M&E maintenance tasks safely and to an agreed standard within a defined portfolio to a required Service Level. To provide first line response to all emergencies during normal working hours and out of hours when on call

ACCOUNTABILITIES

- To undertake all M&E reactive and planned maintenance tasks allocated and completed to an agreed standard, and to be available when on-call to ensure effective response and resolution, to then satisfy customer needs/escalation where appropriate.
- To ensure work is carried out in compliance with all health and safety requirements and to adhere to the best working practices.
- To sponsor and complete M&E surveys and technical reports as necessary and to cascade all key data to relevant personnel throughout field operations.
- To complete relevant HR processes including: notification of absence, holiday management, training needs and completion of timesheets.
- You are what the client sees first; make a good impression (ensure you comply with dress code and maintain your vehicle in good condition)
- Work towards the achievement of tasks within SLA times, work orders opened and closed in real time
- The timely completion of reactive and planned works carried out to agreed standards, achievement of first fix and equipment uptime.
- To ensure parts and materials are ordered in a timely manner through company processes
- To act in accordance to the Health and Safety policy when issues as such arise
- To work proactively to manage task volumes in conjunction with the Planning and Dispatch team
- To ensure appropriate audits and checks (seasonal) are carried out in line with standards provided
- To order and fit parts or components as prescribed by company procedures
- To notify the company P&D team of procedural task condition on completion of works
- To effectively diagnose and identify faults and failures with equipment and systems and provide effective solutions and escalate where necessary.
- To Investigate and report any problems and incidents
- To actively support colleagues building a teamwork approach e.g. – supporting with training and up skilling of apprentices and communicating regularly and assisting when required.
- To provide M&E technical support as required, e.g. advice regarding major operational issues.
